The Shoreboundangler e-bike adventures begin!

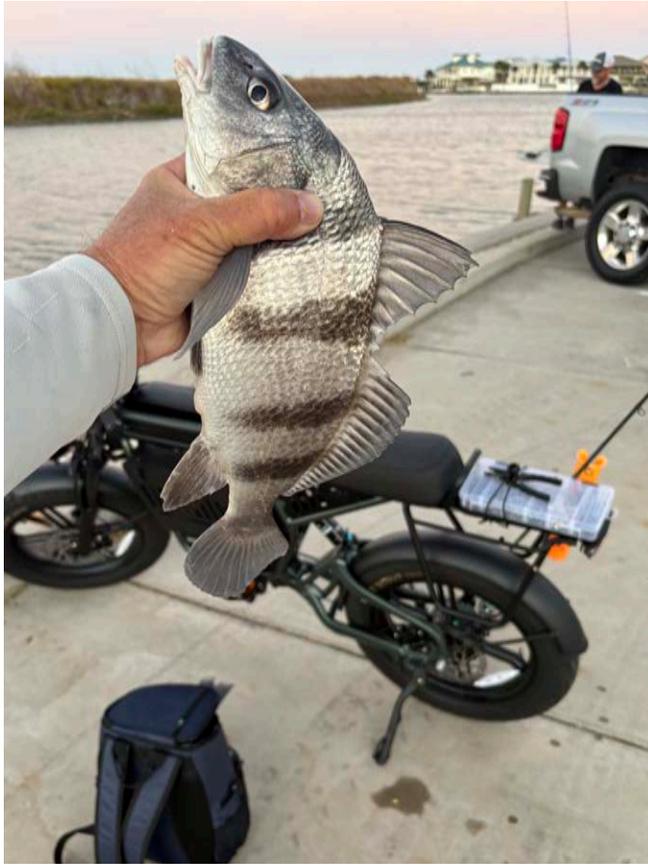

I got an e-bike recently. To justify having it I installed a rack and some rod holders to fish in the neighborhood. The maiden trip could not have gone better!

Rather than regale you with a blow-by-blow description of how I fished and what I caught, I'll let the pictures tell the story. It was a fun and productive trip!

Dead shrimp on bottom was the ticket. Action was fast for small drum and croaker!

I think I'm going to like this e-bike fishing. Ended up with enough fish to put some back in the freezer!
